

## WITHDRAWAL FORM

- Please provide a narrative account of the circumstances relative to your withdrawal, including the approximate hour, weather conditions, number of persons aboard and the reason for withdrawal. If structural or mechanical failure were the cause, please describe in detail. Your evaluation of the seagoing capability of your crew will be helpful. Include any radio contacts (EPIRB and email, too) and their responses. Describe injuries, if any. Was the gear deployed and not picked up? If so, what? Any additional information you care to add will be appreciated, such as attempts to repair, assistance rendered by other vessels, etc. Note: In an effort to better understand products that contribute to failure of passage, please include specific mention of product performance deficiencies related this incident.
